Student Elective Report

	the staff were happy to teach microsurgery skills using animal tissue models. The team in the department were friendly and keen to teach and include us in day-to-day activities, including introducing us to a variety of local food. It was interesting to observe the team from Facing the World operate on complex and unusual cases and attend their teaching. Vietnam is an interesting and beautiful country to explore, also Vietnamese food is really good.

What problems did you

Student Elective Report

to choose a career in plastic surgery as a result of this experience?	career in this speciality. I had a fantastic experience in Hanoi with the Aesthetic, Plastic and Maxillofacial Surgery department and enjoyed seeing this specialty in Vietnam; I had a lot of encouragement and advice from the team here, all of which has furthered my interest and motivation to pursue a career in this field.
